

AHMED ABDELAZIZ ELDEEB

Senior Technical Office & Design Specialist | Electrical Busbar Systems | Manufacturing

Sadat City, Menoufia, Egypt | +2015 00 66 222 1 | A.AbdelazizEldeeb@gmail.com

LinkedIn Profile: [linkedin.com/in/aabelazizeldeeb](https://www.linkedin.com/in/aabelazizeldeeb) | Portfolio: aabelazizeldeeb.github.io

PROFESSIONAL SUMMARY

Senior Technical Office & Design Specialist with over 5 years of specialized experience in electrical busbar manufacturing and power distribution systems, complemented by a strong foundation in data analysis and automation. Experienced in managing the full technical project lifecycle, including preliminary 2D/3D design, shop drawings, BOQs, MTOs, material submittals, CNC fabrication coordination, production follow-up, and delivery documentation. Demonstrated ability to improve engineering workflows through advanced Excel computational models, Power BI reporting, and data-driven analysis, reducing calculation time by 70% and fabrication scrap and material waste by 20%. Proven track record of supporting large-scale industrial, commercial, infrastructure, hospitality, and residential projects.

CORE EXPERTISE

Technical Office & Design | Electrical Busbar Systems | Power Distribution Systems | Preliminary 2D/3D Design | Shop Drawings | BOQ Preparation | Material Take-Off (MTO) | Material Submittals | Sheet Metal Fabrication | CNC & Router Fabrication | Production Coordination | Design Coordination | Technical Documentation | 3D Visualization | Technical Product Catalogs | Engineering Workflow Automation | Data Analysis & Reporting

TECHNICAL SOFTWARE & DIGITAL TOOLS

Engineering & Design: AutoCAD | Autodesk Inventor | Revit | 3ds Max

Data & Automation: Advanced Excel | Dynamic Computational Models | Power BI

Manufacturing: CNC & Router Fabrication Layout Tools

Additional Technical Skills: Internal Tool Development (HTML | CSS | JavaScript | Tauri Framework)

PROFESSIONAL EXPERIENCE

Power Busbar for Electrical Industries

Senior Technical Office & Design Specialist | Acting Team Leader

August 2021 – Present

- Lead and mentor a team of engineers, reviewing technical and production drawings, assigning tasks, and ensuring adherence to project deadlines, technical requirements, and quality standards.
- Directed the complete technical project lifecycle, from preliminary 2D/3D design and shop drawings through production coordination and final dispatch review.
- Developed advanced dynamic computational models in Excel to automate comprehensive engineering and fabrication calculations (including short-circuit limits, voltage drop, and sheet metal bend deduction), reducing overall calculation time by 70%.
- Ensured rigorous compliance with international IEC standards, developing highly competitive busbar systems that meet or exceed the technical performance of global market leaders.
- Evaluated complex industrial layouts to determine optimal busbar routing and precise enclosure protection requirements, resolving critical site discrepancies.

- Supervised the preparation of precise BOQs, material take-offs (MTOs), and Technical Submittals, ensuring seamless consultant approvals.
- Optimized raw material utilization and CNC routing layouts for copper and aluminum fabrication, reducing fabrication scrap and material waste by 20%.
- Approved realistic 3D visual content and technical product catalogs using 3ds Max, translating complex engineering designs into professional client-facing deliverables.

Egyptian Armed Forces — Military Service | March 2020 – July 2021

Rihana for Agriculture Investment

Accountant & Data Analyst

December 2018 – February 2020

- Analyzed financial data and prepared management reports using advanced Excel functions and data analysis techniques.
- Structured and consolidated complex multi-file datasets, performing extensive data cleaning to improve data accuracy and consistency.
- Prepared and filed tax returns in accordance with applicable tax laws and regulatory requirements.

SELECTED PROJECTS

- King Salman Airport, KSA — Preliminary Design, Shop Drawings, Fabrication Coordination, and Delivery Documentation.
- New Mars Factory, Egypt — Preliminary Design, Shop Drawings, Fabrication Coordination, and Delivery Documentation.
- Dubai Mall, Egypt — Preliminary Design, Shop Drawings, Fabrication Coordination, and Delivery Documentation.
- Fairmont Hotel, KSA — Technical Design and Fabrication Support.
- Port Said Airport, Egypt — Technical Design and Fabrication Support.
- **Additional Projects:** Ahl Misr Walkway, Central Bus Station, Boysen Factory, Chipsy Factory, Cleopatra Mall, Hilton Hotel Hurghada, L'avenir City, Golf Palm Hills, Zed East Club.

EDUCATION

Bachelor of Law

Sadat City University | 2015 – 2019

LANGUAGES

Arabic (Native) | English (Very Good) | French (Good)
